May 16, 2025

Dear Parents and/or Guardians of Grade Five Students:

As part of the fifth-grade science curriculum, the endocrine and reproductive systems are studied each spring. The Student Support Team will be showing audio-visual materials as an integral part of teaching the unit on Human Growth and Development.

Prior to using the materials in the classrooms, we invite parents of students currently in fifth grade to view them. We encourage you view the presentation so that you can better understand how the Human Growth and Development program will be implemented within the fifth grade classrooms.

You can access the video that will show to females at this link:

<https://www.youtube.com/watch?v=gv21b3ZpSLg>

You can access the video that will show to males at this link:

<https://www.youtube.com/watch?v=2XF0awGRTWs>

An alternative lesson in the same content area can be provided if you do not wish your child to participate in the classroom media presentation.

Thank you for your cooperation.

Sincerely,

Nicole M. Rheault

Dr. Nicole Rheault
Principal

I have been informed of the fifth grade Human Growth and Development unit and have been provided with the links to preview the audio-visual materials used as part of the instruction. Please sign and return by Friday, May 21, 2025.
